

Welcome to the 2021 Annual Report.

Animal Hope Uganda is a 501(3) non-profit organization registered in the United states and in Uganda as charity, since 2020.It was born out of community concern for animals living in cruelty.

Our goal; is to stop animal suffering.

Our Mission is to enhance the lives of all animals in need.

Our vision ; to create a holistic society where all animals are treated humanely.

Activities and achievements.

Animal hope uganda manages a shelter called 'The hope' At the shelter we keep all rescued, dogs , cats puppies and kitties. All animals abandoned and mistreated are treated and sterilized before being put out for adoption.

In the previous yr 2021 we took care of 221 animals more than 2020. The shelter received 118 dogs, 28 cats and 60 puppies, this was more than double from the yr we were established.

Most of the animals received were abandoned and unwanted puppies unlike the first yrs.

This could be attributed to the devastating impact of covid19 to the communities, we saw more puppies abandoned than dogs.

The management introduced Hope nourish relief, a new program, providing nutrition and food related supplies to poor families to support them during the pandemic. It was introduced to prevent poor families from dumping unwanted puppies and abandoning breastfeeding mothers, due to economic conditions during covid19.

BAR GRAPH SHOWING ANIMALS CARED FOR IN 2021

Table 1

	Category A
Dogs	118
Cats	28
Puppies	60
Kittens	15

This year compared to the year 2020, we treated up to 300 animals during home visits, and we held 4 public sensitization meetings. 80 animals were sterilized. Animal hope achieved more in community outreach programmes compared to other charity programmes, we empowered more communities to prevent cruelty and reduce abandonment.

Our health principle is a healthy animal, equals less disease spread and it's linked to healthy communities and environment.

We have as well responded to a high number of calls from people who no longer wanted, or given their circumstances during the pandemic, could no longer afford to take care of their animals and requested to have them removed. Where possible we work with individuals, providing advice and nutritional support, to avoid abandonment.

Volunteer and staff

Animal Hope Uganda has 5 paid staff members: a manager, vet, two caretakers and one night security guard. Many kind volunteers put in their time and skills to help us serve animals in need last year. We appreciate all help and support.

Donations and fundraising

A huge thank you to all our donors both local and international, for your ongoing support to the Animal hope. Year after year your unwavering financial and in-kind support enables us to run and we are extremely

grateful to you. We received many cash and in-kind donations from supporters and local businesses.

Rehoming:

Our team at “The hope” works tirelessly to find homes for every single animal in our shelter, only 12 dogs, 8 kitties and 18 puppies were adopted in the previous year. With more community meetings and publications, the word is being spread ,more and more people get to know us and communities have realized the impact of our work. Our plan is to promote adoption on social media and our website. Since internet use is still a luxury in our communities , we plan to put up street posters highlighting animals looking for homes.

The Future

The future of our projects is promising and bright,based on the support and recognition our work has received. Our priority is to secure reliable transport,our outreach team uses bicycles to make home visits and sometimes it’s really hard to respond to emergency calls in a timely manner to pick up injured animals on the roadside.

Secondly, we are still in need of land, to have a secure and spacious home for our animals.our numbers are increasing and we are almost outliving the rented plot.

Our organization has done everything right, but covid19 and the economic downturn has had serious and in the same cases devastating effects on our programs. Despite challenges we have been able to register significant progress and save the lives of animals.

Thank you so much from the bottom of our hearts .

Worldwide 2020 was a challenging year. Many people were badly impacted financially and donations organizations like us declined. We feel very blessed to have such wonderful and loyal supporters. You stood with us during the most difficult time. The Animal hope team is truly grateful.
